

Certificate II in Innovation

The Certificate II in Innovation turns the usual School-Based Traineeships on their head. This new accredited program gives High Schools the ability to teach senior school students how to create their own future by introducing them to the world of innovative business creation.

Up to 40 per cent of current Australian jobs could disappear within the next 10 to 15 years as robots and computers continue their unstoppable advance. (abc.net.au)

The 'Just Start It' program is preparing tomorrow's adults to use technology to solve problems, and then teaches them how to take their product to market. It teaches them to create their own future and design their own path in a world that no longer determines success based on following the status quo.

This is a fully supported, 37 week program that provides teachers with a comprehensive program including; digital technology, links, resources and lesson plans. Allowing you to change the shape of your student's future.

Join us to create tomorrow's jobs - today.
